

Super King Air 350

With room for up to nine passengers, the Super King Air 350 can transport an entire team of employees in comfort. Ideal for long-range flights -- yet efficient enough for shorter trips -- the Super King Air 350 can routinely reach either coast non-stop from the Midwest. State-of-the-art navigation equipment and a pressurized cabin make for smooth and safe flying. The cabin has all-leather double club seating, stowable worktables, and built-in refreshment centers. Additional features include in-flight accessible storage areas, and a flushing toilet with solid wood privacy door located in the aft cabin.
